

DATA FLOW DIAGRAM:

DATE	
PROJECT ID	LTVIP2025TMID30602
PROJECT NAME	Optimising user, group and role management with access control list and Workflows

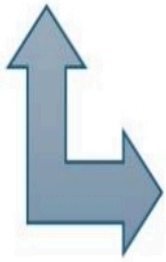

A data-flow diagram is a way of representing a flow of data through a Process or a system. The DFD also provides information about the Outputs and inputs of each entity and the process itself. A data-flow diagram has no control flow there are no decision rules and no

Loops

USES :

- Visualizes data movement in a system clearly and logically.
- Identifies system inputs, outputs, processes, and data storage Elements.
- Helps in system analysis by understanding the flow of Information.
- Simplifies complex systems into understandable components.
- Helps in system analysis by understanding the flow of Information.
- Simplifies complex systems into understandable components.
